Blue Pot Energy Exchange:

Our intent is to use a process of exchange by which all our needs are met, we all feel cared for and our gifts to each other are honored and received. We call this process “*working with the blue pot*”. In the Blue Pot, money is alchemically transformed into “golden water” which flows to heal through sharing, caring, loving, giving and receiving. (to learn more about the background of this concept see www.yescarefirst.com). We invite you to join the circle of sharing by caring for us with your financial (and/or other gifts). To give you a guideline about what would help us at least cover our costs and care for the basics so we can continue our work, we offer a suggested contribution of \$180 - but if finances are limited, please don't feel that you cannot come.

Facilitators:

Gabriella Kapfer:

Gabriella is a sound healer who has developed her own style of vibrational sound weaving and healing with cello, voice and hand-crafted singing bowls. Gabriella calls forth and co-creates with the elements, the nature-spirits and the angelic realms weaving a tapestry of sound from different dimensions, the consciousness of all present and the Earth – leading listeners into a deep transformative experience and connectedness with nature, life and Source. She also teaches and works with sacred stone setting, and has a background in psychotherapy and co-creative gardening. Her background includes co-running a small retreat and healing center in Scotland based on a ‘care-first’ economic model where she developed her sound-healing work, inspired by the mystery school of nature which surrounded her. She currently lives in England and travels extensively through Europe and the Americas, bringing her healing music and work to different parts of the planet. www.yescarefirst.com/songbird.htm

Terry Frank:

Terry is a healer whose primary work is to create a bridge of understanding and partnership between humans and the elemental world of nature spirits, so that we may work together again to bring healing to each other and the Earth. Terry has trained for over 7 years as a Spiritual Transformation Guide with the International Institute for Transformation founded by Tanis Helliwell and is a Certified Healing Touch Practitioner who combines 20 years of experience in career transition, life coaching and human resources with energy work and knowledge of the spiritual laws to help people heal and evolve. She has been given the gift of entering the Elemental Kingdom on the etheric and taking others on the journey to gather the ancient stories of the fairy tribes for today, and information for individuals on their relationship to that realm. Terry is writing a book called, “Voice of the Fairy Tribes”.
